Introduction

The Admin Refresh has made it easier for you to configure granular Role permissions. Each administrative area now has a section listing the permission set available for the feature or process.

Previously, Course permissions were configured as View, Modify, and Delete. The Admin Refresh experience has expanded the Modify permission based on the different tiles or sections that exist on the page. This setup allows administrators (with the appropriate permissions) to add or remove access to different areas of the Admin Interface.

This document is a companion to the Absorb Knowledge Base article and provides additional information on how the new Role Permission interface works.

Selecting Permissions

In each section permissions are grouped in a nested waterfall layout. Primary permissions are **bolded**.

Instructions: To enable a permission, click on its checkbox. A checkmark will appear, indicating that the Role grants access to the specified action area.

When a primary permission is enabled, all sub-permissions are automatically selected too.

Online Courses

- View
- Modify**
 - General
 - Syllabus
 - Enrollment Rules
 - Completion
 - Availability
 - Catalog Visibility
 - Course Administrators
 - Messages
 - Resources
 - Course Uploads
 - Attributes
 - Social
 - More
- Delete

Example: Selecting the primary Online Courses checkbox will enable all sub-permissions within the section.

Online Courses

- View
- Modify**
 - General
 - Syllabus
 - Enrollment Rules
 - Completion
 - Availability
 - Catalog Visibility
 - Course Administrators
 - Messages
 - Resources
 - Course Uploads
 - Attributes
 - Social
 - More
- Delete

Example: Choosing a nested primary permission (Modify) will enable all direct sub-permissions AND any required primary permissions (Online Courses).

Important Note

When selecting permissions for a Role, enabling General alone will limit the Role's ability to administer the identified section and may not provide enough access to fulfill their responsibilities. Be sure to pair other options along with it to tailor the administrative experience you want to permit. It is always a good practice to test the Role and verify it performs as intended.

Permission Updates

Online Courses, Curricula & Course Bundles

Overview

- The "General" permission checkbox must be selected (checked) for the course type permission set to allow the Role to create new Online Courses, Curricula, and Course Bundles
- When you enable the Admin Refresh experience for your environment, any role (default or custom) that has the "Modify" permission selected will grant all tile or section permissions.

New Role Permissions

Online Courses

The following table lists the new Role permissions available for Online Courses, and the access provided when enabled.

Permission	Grants Access to Modify
General	<ul style="list-style-type: none"> • Title • Course Status • Language
Syllabus	<ul style="list-style-type: none"> • Learning Objects and Courses • Terms & Conditions • Completion
Enrollment Rules	<ul style="list-style-type: none"> • Self-Enrollment and Automatic Enrollment Rules • Enrollment Approval • Enable E-Commerce, Allow Public Purchase and Default Price
Availability	<ul style="list-style-type: none"> • Access, Expiration, and Due Dates
Completion	<ul style="list-style-type: none"> • Certificates • Allow Re-Enrollment • Competencies • Post Enrollment Actions
Catalog Visibility	<ul style="list-style-type: none"> • Categories
